

SYED MUHAMMAD HAMZAH RIZVI

Customer Operations & Technical Support

Manchester, UK | 07478 631940 | hamzahrizvi2@gmail.com | linkedin.com/in/hamzah-rizvi | github.com/hamzahrizvi | hamzahrizvi.github.io

PROFESSIONAL SUMMARY

Technical support specialist with 3+ years owning complex, escalated technical issues (not first-line volume) across 6–15 concurrent international deployments spanning 10+ countries, personally resolving 10–25 detailed technical cases per week across APIs, devices, firmware and networks. Built and shipped an internal AI knowledge assistant now serving 300+ customer accounts weekly, backed by a 140+ test regression suite and a 34-case evaluation harness — associated with a 40% reduction in first-line ticket volume and a 55% reduction in resolution time per Jira metrics since release (tracked alongside other concurrent initiatives). Authored 30+ internal guides and troubleshooting resources, and delivered 10+ training sessions to groups of 30+ colleagues and stakeholders. Intermediate SQL, hands-on Python, and a consistent focus on fixing the underlying system rather than the individual ticket.

CORE SKILLS

- **Technical Troubleshooting:** Deep, complex issue diagnosis (not first-line), log analysis, configuration vs. environment vs. product triage, distributed systems debugging.
- **Tooling & Documentation:** Building internal AI tools and automations, authoring troubleshooting documentation, self-serve knowledge base design.
- **Training & Enablement:** Designing and delivering PowerPoint-based training to large internal groups on both existing products and internally built AI tools.
- **Programming & Data:** Python, C++, SQL (intermediate), FastAPI, REST APIs, webhooks, JSON, Docker, Git.
- **Collaboration:** Partnering with engineering across international teams; clear, context-rich escalation writing.

PROFESSIONAL EXPERIENCE

Technical Software Consultant — Innovative Technology, Manchester, UK

Mar 2023 – Present

- Own 6-15 concurrent international deployments at any time, personally resolving 10-25 complex, escalated technical issues per week spanning APIs, devices, firmware and networks — not first-line volume.
- Designed and shipped an internal AI knowledge assistant now associated with a 40% reduction in first-line ticket volume and a 55% reduction in resolution time, per Jira metrics tracked since release (measured alongside other concurrent initiatives, including a Rovo rollout, so effects are not isolated to this tool alone).
- Authored 30+ internal integration guides and troubleshooting resources used across the support and engineering teams.
- Delivered 10+ training sessions to groups of 30+ internal colleagues and stakeholders, covering both existing biometric products and internally built AI tools.
- Supported deployments across retail, gaming and compliance-focused environments spanning 10+ countries, serving 300+ customer accounts weekly via a self-built AI support widget.
- Use AI-assisted tools daily to speed up diagnosis and documentation, validating output against reproduced behaviour rather than accepting it blindly.

Automation Engineer — Tripack Films Ltd., Pakistan

Mar 2020 – Sep 2021

- Led implementation of a building-management system for utility monitoring and automation, contributing to an approximately 25% improvement in energy efficiency.
- Established an in-house electrical repair capability and trained technicians in structured fault diagnosis, reducing reliance on external support.

Software Consultant — Evolligence, Pakistan

Dec 2019 – Mar 2020

- Built and supported backend application logic using structured APIs and data-driven workflows, collaborating with development teams on delivery.

SELECTED PROJECTS

GroundedOps — RAG Support Assistant *Python, FastAPI, Docker, ChromaDB, SQL*

- Built and deployed a production RAG assistant over hardware documentation, serving 300+ customer accounts weekly via a public embeddable widget and admin console.
- Associated with a 40% reduction in first-line ticket volume and 55% reduction in resolution time per internal Jira metrics since release (confounded with other concurrent initiatives — not a controlled measurement).

- Built a 140+ test regression suite tied to named, diagnosed bugs, and an eval harness gating changes against 34 real test cases before shipping.

Age & Demographic Estimation *TensorFlow/Keras, EfficientNetB0, VGG16*

- Trained a hierarchical multi-task EfficientNetB0 model on 274k+ images (WIKI/IMDB, fine-tuned on UTKFace); achieved 87.5% gender accuracy, 88.4% coarse-age accuracy, 92.6% near-group (± 1) accuracy and 8.52-year MAE.

EDUCATION

MSc Robotics and Automation (Minor in AI) — University of Salford, UK

2021 – 2022

Graduated with Distinction.

BEng Electrical Engineering — NUST, Pakistan

2015 – 2019

Focus: computer vision, machine learning and robotics.
