

SYED MUHAMMAD HAMZAH RIZVI

Integration Engineer | APIs & Connected Devices

Manchester, UK | 07478 631940 | hamzahrizvi2@gmail.com | linkedin.com/in/hamzah-rizvi | github.com/hamzahrizvi | hamzahrizvi.github.io

PROFESSIONAL SUMMARY

Technical consultant with 3+ years delivering end-to-end customer onboarding, implementation and integration for enterprise SaaS deployments, across up to 15 concurrent projects spanning 10+ countries. Hands-on with REST API design and testing (Postman, Swagger), authentication flows, and API-based integration workflows connecting cloud-connected devices and products into customer platforms, from vending, kiosk and access-control hardware to enterprise systems. Built and shipped an internal AI knowledge assistant now serving 300+ customer accounts weekly, and authored 30+ integration guides, technical specifications and mapping documents used across support and engineering teams. Acts as the primary technical point of contact for customer configuration requests, manages multiple concurrent projects with minimal oversight, and feeds customer feedback back to product and engineering to influence roadmap priorities.

CORE SKILLS

- **API Integration & Tooling:** REST API design, testing and documentation (Postman, Swagger, cURL), authentication flows (OAuth-style, Entra ID), payload construction, JSON/XML/CSV data formats, webhooks.
- **Connected Devices & Partner Integration:** Integrating cloud-connected hardware (biometric devices, kiosks, vending and gaming machines) with customer and partner platforms via REST APIs and webhooks; system-to-system integration design; troubleshooting across devices, firmware and networks.
- **Implementation & Onboarding:** End-to-end customer onboarding, technical configuration and customisation, project management across concurrent workstreams, training and enablement delivery.
- **Stakeholder & Project Management:** Customer-facing technical ownership, cross-functional collaboration with Customer Success and Product teams, proactive multi-project tracking, escalation management.
- **Programming & Tools:** Python, C++, FastAPI, SQL (intermediate), JSON, Docker, Git.

PROFESSIONAL EXPERIENCE

Technical Software Consultant — Innovative Technology, Manchester, UK

Mar 2023 – Present

- Lead end-to-end implementation of AI-powered identity-verification solutions for enterprise customers, from technical configuration through integration, testing and go-live, across up to 15 concurrent international deployments.
- Design and test REST API integrations using Postman and Swagger, building payloads and configuring authentication flows to connect products with customer platforms and internal systems.
- Act as primary technical point of contact for customer configuration and customisation requests, working directly with customer IT and operations teams to translate requirements into working integrations, and as the escalation route for complex integration issues spanning APIs, devices, firmware and networks.
- Conduct training and Q&A sessions with customers and internal stakeholders, empowering teams to use products and internally built tools independently and confidently.
- Proactively manage multiple concurrent customer implementation projects, tracking progress and ensuring timelines are met across international deployments spanning 10+ countries.
- Capture customer feedback and recurring implementation challenges, feeding structured input back to product and engineering teams to influence roadmap priorities.
- Produce developer-facing technical specifications, mapping documents and integration guides that reduce implementation risk and make onboarding repeatable and increasingly self-service.

Automation Engineer — Tripack Films Ltd., Pakistan

Mar 2020 – Sep 2021

- Coordinated engineering, operations and projects teams to commission industrial control and automation systems safely and on schedule; led a building-management system implementation for utility monitoring (approximately 25% energy-efficiency improvement).

Software Consultant — Evolligence, Pakistan

Dec 2019 – Mar 2020

- Built and supported backend application logic using structured APIs and data-driven workflows, collaborating with development teams on delivery.

SELECTED INTEGRATION PROJECTS

- **Vending & Cloud Platform Integration:** Integrated biometric verification systems with multiple vending-machine providers, connecting machine-side software to cloud-based customer accounts via REST API — enabling automated account management and increasing sales by up to 25% among affected customers.
- **Retail Kiosk Automation:** Led systems integration for retail kiosk solutions, connecting kiosk software to verification services via API-based communication, saving up to 50 hours per month in manual interaction time.
- **GroundedOps — Internal Knowledge Base & Support Assistant:** Designed and deployed a production RAG-based assistant now serving 300+ customer accounts weekly, backed by a 140+ test regression suite — associated with a 40% reduction in first-line ticket volume and 55% reduction in resolution time per internal Jira metrics.

EDUCATION

MSc Robotics and Automation (Minor in AI) — University of Salford, UK

2021 – 2022

Graduated with Distinction.

BEng Electrical Engineering — NUST, Pakistan

2015 – 2019

Focus: computer vision, machine learning and robotics.
